I'm running into this issue with a win11 enterprise laptop that's unable to connect to the file shares on my home network by IP through windows explorer. If I connect to ...

I would recommend always aligning partitions on 1 MB or even 2 MB boundaries. That should improve changes of having good boundaries even with SMR HDD or TLC SSD ...

I use the server ip to try to access, the server answers by asking the user and password, i enter the same user and password i use to connect via RDP but it keep answers ...

I deleted all partitions from a MacBook Pro and installed Windows 8 on it from a disk, then upgraded to Windows 10. However, after running Windows Update, it still lacks ...

I have not figured out what is wrong with the command but I have found a workaround: It turns out that it is possible to connect network drives within the file explorer too, ...

I want to change the MTU size on a VPN network interface but I can't change as it says &quot;element not found&quot;, is the command incorrect? Type netsh interface ipv4 show ...

Since some time I can not connect to a local samba share anymore. When I try to access & lt;server ip& gt;drive, I get the following dialog: When connecting using the ...

The Wikipedia page has since changed, and now says &quot;although any address in the range 127.0.0.1 to 127.255.255.254 is mapped to it&quot;, rendering the gist of this answer in direct ...

Assuming this is a BIOS password, you must contact an authorized HP Service Center or HP Support directly and be capable of showing proof of ownership, there could and ...

The solution to the problem is based on an answer to the post Can not connect to share (system error 1272), although only part of that answer was required. The following lines ...
