Set the JAVA\_HOME Variable Windows 7 - Right click My Computer and select Properties &gt; Advanced  
Windows 8 - Go to Control Panel &gt; System &gt; Advanced System Settings Windows ...

I'm using Windows as a simple user (I don't have any admin rights) and want to install NodeJS LTS. On the  
download site I have the choice to download only the binary ...

Why do we need the concept keyword in C++20? Asked 2 years, 10 months ago Modified 2 years, 10 months

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the  
way to go today. For example, &quot;%20&quot; is the percent-encoding for ...

Since it's not mentioned anywhere in the grammar, the only way to encode a space is with percent-encoding  
(%20). In fact, the RFC even states that spaces are delimiters and should ...

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference  
and why should this happen?

I am interested in knowing why "%20" is used as a space in URLs, particularly why %20 was used and why  
we even need it in the first place.

310 A bit of explaining as to what that %2520 is : The common space character is encoded as %20 as you  
noted yourself. The % character is encoded as %25. The way you get ...

@MetaByter I think it is more technically correct to phrase the question as &quot;In a URL, should I encode the spaces using %20 or + in the query part of a URL?&quot; because while the example ...
