I'm using Windows as a simple user (I don't have any admin rights) and want to install NodeJS LTS. On the download site I have the choice to download only the binary ...

Why do we need the concept keyword in C++20? Asked 2 years, 10 months ago Modified 2 years, 10 months ago Viewed 7k times

Sometimes the spaces get URL encoded to the + sign, and some other times to %20. What is the difference and why should this happen?

OpenSSL Verify return code: 20 (unable to get local issuer certificate) Asked 13 years, 5 months ago Modified 1 year ago Viewed 390k times

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example ...

Set the JAVA_HOME Variable Windows 7 - Right click My Computer and select Properties > Advanced Windows 8 - Go to Control Panel > System > Advanced System Settings Windows ...

310 A bit of explaining as to what that %20 is : The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get ...

Since it's not mentioned anywhere in the grammar, the only way to encode a space is with percent-encoding (%20). In fact, the RFC even states that spaces are delimiters and should ...

I am interested in knowing why "%20" is used as a space in URLs, particularly why %20 was used and why

we even need it in the first place.

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, "%20" is the percent-encoding for ...
