great deals and sell ...

As a dedicated solar inverter manufacturer, we maintain strict quality standards to ensure reliability in every unit. Our global service network, responsive customer support, and capacity ...

This report builds on a parallel effort to create a database of solar energy installers in the Caribbean in partnership with CARICOM, and with support from the Clean Energy Solutions ...

Rex series solar especially for solar pumping applications. Based on the original solar pump inverter products, which optimizes the usability and performance, and extends applicable ...

As a dedicated solar inverter manufacturer, we maintain strict quality standards to ensure reliability in every unit. Our global ...

OverviewRenewable energy resourcesElectricity supply and demandAccess to electricityService qualityResponsibilities in the electricity sectorHistory of the electricity sectorTariffs and subsidiesAs it has been described, most electricity generation in the Dominican Republic comes from thermal sources. Only 14% of the installed capacity is hydroelectric, with this percentage falling to below 9% when all the thermal self-generation is accounted for. The exploitation of other renewable resources (i.e. solar, wind) is very limited. However, this situation is expected to change following the enactment of in May 2007 of the Law of Incentives to Renewable Energy and Special Regimes
