-----  
Should federal facilities use managed and bidirectional charging?

Federal facilities and their fleets serve critical missions that may be compromised or require backup power in the event of a grid outage. As the federal government moves toward fleet electrification, site decarbonization, and deployment of local distributed energy resources (DERs), agencies should consider both managed and bidirectional charging.

Can bidirectional vehicles power the grid?

Bidirectional vehicles can also power the grid through 'vehicle to grid' (V2G) to provide various grid services, although the programs to incentivize these grid services are not yet widely in place for vehicle applications.

What is a bidirectional EV?

A bidirectional EV can receive energy from an EVSE (charge) and provide energy to an external load (discharge), and is often paired with a similarly capable EVSE. Often bidirectional vehicles are employed to provide backup power to buildings or specific loads, sometimes as part of a microgrid, through 'vehicle to building' (V2B).

As bidirectional charging technologies are still largely untapped, scaling their adoption will require a coordinated effort across the ecosystem. ...

As the federal government moves toward fleet electrification, site decarbonization, and deployment of local distributed energy resources (DERs), agencies should consider both ...

Explore the evolving landscape of bidirectional charging in 2023, uncovering utility trends, key barriers, and early programs. Learn ...

As bidirectional charging technologies are still largely untapped, scaling their adoption will require a coordinated effort across the ecosystem. Manufacturers, OEMs, regulators and end users ...

As the federal government moves toward fleet electrification, site decarbonization, and deployment of local distributed energy resources ...

Discover how bidirectional charging unlocks new energy solutions, from V2G to V2H, enhancing grid stability, cutting costs, and supporting renewables.

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and ...

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and feed this energy back into the ...

However, the bidirectional charging industry is in the early stages of transitioning to a commercial product ready for mass-market adoption, and at this time, challenges and barriers to ...

Two-way or bi-directional charging of electric vehicles provides a huge opportunity to turn electric vehicles into an additional energy storage system and save excess electricity, making it ...

However, the bidirectional charging industry is in the early stages of transitioning to a commercial product ready for mass-market adoption, ...

The case study focuses on rural distribution grids in Southern Germany, projecting the repercussions of different charging scenarios by 2040. Besides a Vehicle-to-Grid scenario, ...

Results of a comparative environmental impact assessment show the environmental impacts of unidirectional (V1G) and bidirectional charging infrastructure (V2G) ...

Discover how bidirectional charging unlocks new energy solutions, from V2G to V2H, enhancing grid stability, cutting costs, and ...

We supply intelligent charging infrastructure for bidirectional applications - from consulting to planning to turnkey installation. Future-proof, grid-friendly and perfectly tailored to your ...

Explore the evolving landscape of bidirectional charging in 2023, uncovering utility trends, key barriers, and
