How many wind component manufacturing facilities are there in the US?

More than 20 new wind component manufacturing facilities have been announced, including 12 onshore and 9 offshore plants. Rising local manufacturing is helping to offset supply chain disruptions and reduce dependency on imports. These investments also position the U.S. for stronger offshore wind growth through the decade. 2.4.

Where are Vestas wind turbines made?

Vestas, one of the largest wind turbine companies in the US, operates two major wind turbine manufacturing facilities in Colorado. One in Brighton for nacelles and hubs, and the other in Windsor for blades. Both manufacturing plants span a combined 931,000 square feet.

Who is Vestas Wind Systems a/s?

Vestas Wind Systems A/S is the second largest wind turbine manufacturing company in the USA. In 2024, Vestas spent USD 1.7 billion across the USA supply chain with more than 1000 suppliers. The Danish company founded in 1945 has 49,000+MW of installed capacity and over 43,000+MW wind turbines under service across the U.S. and Canada.

Where can I find a list of wind research and development projects?

Renewable portfolio standard To view a list of wind research and development projects in California funded by the U.S. Department of Energy's Wind Energy Technologies Office, visit the Wind R&D Projects Map and select California from the dropdown menu.
