"The Q1 2025 results demonstrate the demand for energy storage in the US to serve a grid with both growing renewables and growing load. However, the industry stands at ...

Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry ...

The U.S. energy storage market size crossed USD 106.7 billion in 2024 and is expected to grow at a CAGR of 29.1% from 2025 to 2034, driven by increased renewable energy integration and ...

Rapid cost declines in lithium-iron-phosphate (LFP) technology, the pivot to >6-hour battery energy storage systems (BESS), and the accelerating electrification of transport ...

Further, the energy storage industry report explores high-impact subfields such as virtual power plants (VPPs), flow batteries, and hydrogen storage by offering insights into their ...

Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector
