-----

Global solar and energy storage leader Sungrow has announced the successful commissioning of a 60MWh Battery Energy Storage System (BESS) project in Simo, Finland, ...

Designed to store and release energy with high efficiency, the system will significantly contribute to grid stability. The project was delivered on a ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy ...

The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland. Set to go online in 2026, the facility will enhance grid stability, energy resilience and accelerate ...

The 30 MW / 36 MWh system, located in Valkeakoski, Finland, is not only a technological breakthrough but also a significant step forward for Europe's energy transition. The project is ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking ...

Our first BESS site is located in Luvia, with a capacity of approximately 50 MW / 100 MWh. According to the preliminary schedule, ...

Designed to store and release energy with high efficiency, the system will significantly contribute to grid stability. The project was delivered on a turnkey basis by Merus Power and has been ...

Finland has launched the Nordic region's first grid-forming battery energy storage system (BESS) at Fingrid's Virkkala substation. This 30 MW/30 MWh facility was developed by ...

Sweden-headquartered BESS developer-operator Ingrid Capacity will build a 70MW/140MWh project in Finland, which it claimed ...

Finland's solar and storage sectors are heating up. Explore the 23 GW+ pipeline, bold PPAs, and the AI-powered BESS shaping its energy future.

An agreed reform of Finland's Electricity Market Act, set to enter into force this summer, will allow developers to connect battery energy storage systems (BESS) and solar production through a ...

The 30 MW / 36 MWh system, located in Valkeakoski, Finland, is not only a technological breakthrough but also a significant step forward for ...

Sweden-headquartered BESS developer-operator Ingrid Capacity will build a 70MW/140MWh project in Finland, which it claimed will be the largest in the country.

Our first BESS site is located in Luvia, with a capacity of approximately 50 MW / 100 MWh. According to the preliminary schedule, work will begin in April, and Suvic's part of ...
