The Government propose changes to the Nationally Significant Infrastructure Project (NSIP) regime to increase the threshold at which solar projects are determined as an NSIP and to re ...

The Government propose changes to the Nationally Significant Infrastructure Project (NSIP) regime to increase the threshold at which solar projects are determined as an ...

The invention relates to a wind and solar hybrid generation system for a communication base station based on dual direct-current bus control, comprising photovoltaic arrays, a wind-power ...

Today's plan follows November guidance by the National Energy System Operator, which said that achieving nearly 100 per cent clean power by 2030 would be a "huge ...

Creating a level playing field for larger scale onshore wind, putting it on the same footing as offshore wind and nuclear, will provide greater certainty to the industry and help deliver the...

However, building a global power system dominated by solar and wind energy presents immense challenges. Here, we demonstrate the potential of a globally interconnected solar-wind system ...

This document is our strategy for delivering for onshore wind, setting out a range of ambitious commitments from the Government and industry to unlock the key barriers to deployment and...

With government's commitment to a strategic target (of 40GW of offshore wind by 2030), the Offshore Wind Industry Council (OWIC) wanted to investigate how the future offshore electricity ...
