In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

The battery storage system provides energy balancing and maintains grid stability on the island of Vis. The system operates on Li-ion batteries which enable rapid response, both in the terms of ...

This battery storage system is pivotal for Croatia to achieve its renewable energy targets, particularly by smoothing out the intermittency of sources like wind and solar.

In September 2020, KONCAR commissioned the 3.5 MW Vis SPP, the largest solar power plant in Croatia at the time. In November 2020, we contracted the development of the 1 MW battery ...

Croatia plans to install 600 MW of storage capacity by 2030 - enough to power 400,000 homes for a full day. The current project represents 26% of this national target.

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, ...

Ever wondered how Croatia's scenic coastal towns and rugged mountain trails maintain reliable power? From Dubrovnik's historic walls to Plitvice Lakes' remote trails, Croatia increasingly ...

Part of these funds will be used to expand the capacity of the liquefied natural gas terminal, and the rest of the money will go to the green transition, so around 500 million euros ...

With solar energy capacity in Croatia growing at 18% annually*, the demand for reliable photovoltaic energy storage batteries has skyrocketed. From coastal resorts to Zagreb's urban ...

Overall, thorough research into these factors will provide valuable insights for anyone interested in entering or expanding within the solar battery sector in Croatia.
