-----

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time ...

The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing ...

The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing for more flexible energy management ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a ...

This article explores how cutting-edge battery storage technology is reshaping the country's power grid while creating opportunities for international collaboration in clean energy ...

The battery system will have a discharge capacity of 38 MW and a storage capacity of up to 70.8 MWh, designed to operate for around twenty years. An environmental ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development ...

This isn't just another solar farm--it's a grid-connected battery storage and virtual power plant (VPP) project that could reshape how Croatia handles renewable energy.

Croatia is preparing to build Eastern Europe's largest energy storage project. IE Energy has secured EUR19.8 million (\$20.9 million) to develop a 50 MW storage system, potentially ...
