Where will 5G be deployed in Africa?

Espoo,Finland - Nokia today announced that it has been selected by African mobile operator,Togocom in a three-year deal to deploy 5G across the country. In the capital city Lome, the 5G network has just been launched -- the first time a 5G network has been deployed in West Africa.

How does 5G work?

5G networks divide coverage areas into smaller zones called cells, enabling devices to connect to local base stations via radio. Each station connects to the broader telephone network and the Internet through high-speed optical fiber or wireless backhaul.

Is 5G coming to West Africa?

In November 2020 Nokia announced that it has been selected by African mobile operator,Togo Telecom in a three-year deal to deploy 5G across the country. In the capital city Lome, the 5G network was subsequently launched -- the first time a 5G network has been deployed in West Africa.

What is a 5G core?

The 5G core (5GC) is a service-oriented,software-defined systemthat separates control and user planes and supports flexible deployment. It replaces the 4G Evolved Packet Core with modular,software-based network functions.

TOGOCOM now offers a 5G network and has activated its commercial 5G network, providing clients with a very-high-speed mobile connection. The 5G network, made possible by partners ...
