Can Bess be used in European electricity markets?

The objective of this work is to analyze the potential utilization of BESS in the major European electricity markets. A general payoff model for BESS operation is proposed to correctly address the operational flexibility of battery systems.

What are the different types of Bess application in electricity markets?

Among all the market applications, energy arbitrage , and frequency regulation are the most common form of BESS application in electricity markets. Energy arbitrage refers to the benefit obtained from the price difference of the whole market: charging during low-price periods, discharging during high-price periods.

Where is Bess available in Europe?

The UK, Italy, Germany and Spain are the four largest markets for BESS in Europe. Figure 1. New capacity forecasts for top 10 European grid-scale energy storage markets 2022-2031 (GWh). Source: Wood Mackenzie.

How much power does Bess use?

Up to the publication of the report, the total power capacity of authorized projects with electrochemical storage is 5499 MW in the UK, almost 10 times higher than the current operating capacity. Fig. 1. Total installed power capacity (in MW) of operated BESS in European countries .
