Create Microsoft Forms based surveys and quizzes in Microsoft 365 for collecting data. Learn to view/analyze Microsoft Forms based survey/quiz results.

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing ...

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

At the MIT Energy Initiative's Annual Research Conference, speakers highlighted the need for collective action in a durable energy transition capable of withstanding obstacles.

Seamlessly use Forms with your favorite apps to connect with audiences where they are. Easily share surveys to collaborate across groups. Ensure everyone's voice is heard with multilingual ...

Welcome to Microsoft Forms! Collect better data and make better decisions. Choose a scenario and start with well-crafted templates.

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and ...

Find Microsoft Forms help and tutorial content. Explore Microsoft Forms training courses, create a survey, share your form, and more.

With Microsoft Forms, you can build survey forms and easily share them with students, parents, and colleagues.

Sign in to unlock Microsoft Forms full capabilities! Design forms with advanced functions Auto-save your work across all devices Collect responses through diverse channels

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...
