DOE is simplifying the environmental review process for certain energy storage systems such as battery systems, transmission line upgrades, and solar photovoltaic systems.

The changes DOE is announcing today promote the development of these storage systems by simplifying the environmental review process for building, operating, upgrading, or ...

DOE's proposed rule promotes the development of these storage systems by simplifying the environmental review process for building, operating, upgrading, or ...

The new categorical exclusion would specifically apply to constructing, operating, upgrading or decommissioning electrochemical-battery or flywheel energy storage systems in ...

DOE has determined that work to be carried out outside of the United States, its territories and possessions is exempt from further review pursuant to Section 5.1.1 of the DOE Final ...

The proposal would add categorical exclusions (CEs) for certain energy storage systems and revise CEs for upgrading and rebuilding transmission lines and for solar ...

The U.S. Department of Energy proposed to amend its National Environmental Policy Act procedures on November 16, 2023, to include a new categorical exclusion for ...

The Department of Energy on Nov. 16 published a notice of proposed rulemaking and request for comment to amend its implementing procedures governing compliance with ...

In the new final rule, DOE changes "removal" of a solar PV system to "decommissioning." Decommissioning
