What is air insulated switchgear for primary distribution?

Our air-insulated switchgear for primary distribution are designed in accordance with the current IEC 62271 standard and are a reliable link in the primary distribution of energy and are used in a variety of demanding situations.

Why should you choose a switchgear company?

Your advantage: you will receive all services from one company. Customer proximity is just as important to us as short distances, fast response times, and high availability. Meaning that you get the product you need quickly. In addition, we are extremely flexible in the manufacture of our switchgears.

Why should you choose Ritter switchgears?

RITTER switchgears - with us, reliability of supply comes first. Planning, development, production - we will take over all steps up to the approval of switchgears for medium-voltage systems. In addition to the delivery of the equipment, we also like to offer you the complete installation, commissioning and regular servicing as well as maintenance.
