Fusion energy projects and start-ups around the world may pursue the goal of fusion energy in different ways by playing to their distinctive strengths.

Nuclear fusion, the process that powers the Sun and stars, merges two atomic nuclei into a larger one. Both reactions release large amounts of energy, but with nuclear ...

A nuclear fusion reactor in South Korea has set a new record, superheating a plasma loop to 100 million degrees Celsius for 48 seconds. The Korea Institute of Fusion ...

Nuclear fusion could transform the world's energy system, our lives and our homes. The latest breakthrough announced by the US Department of Energy gives new momentum.

Advanced nuclear technologies range from fusion and small modular reactors (SMRs) to nuclear fuels and waste management, and they can help address some of the ...

The stellarator could see a comeback in fusion energy research, after years of tokamak focus, which could mean fusion electricity on the grid in the 2030s.

Fusion is the future of the global energy sector and the first fusion power plant is due to begin operations imminently. The world's first commercial fusion power plant should ...

Top energy news: IRENA on why COP is a huge moment for renewables; nuclear start-up claims fusion milestone; huge clean energy hub planned for Australia.

Fusion solar container communication station inverter is connected to the grid and cannot access the Internet

Here too, fusion can supply the solution, potentially allowing for a vast reduction in the land-use footprint of agriculture and shortening the supply chain for fruits and vegetables ...

AI is accelerating breakthroughs in fusion energy, helping tackle challenges in plasma physics and bringing zero-carbon power closer to commercial reality.
