The lithium-ion batteries will hold a combined 765 megawatts of power at four energy-storage sites around the state.

A multi-institutional research team led by Georgia Tech's Hailong Chen has developed a new, low-cost cathode that could radically improve lithium-ion batteries (LIBs) -- ...

US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity.

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC), Georgia legislature, and Talbot and Muscogee counties on Thursday to ...

In a clearing 30 minutes outside Columbus, Georgia Power is almost finished installing what it says will be the state's largest battery storage facility yet, a 65-megawatt ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the ...

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in ...

In total, 765 megawatts (MW) worth of new BESS will be strategically located across Georgia in Bibb,
