How do I power a RTK base station?

To power the base station from a power bank or PC. RTK base station has an SMA connector to connect an antenna. RTK base station does not include, but requires a good quality GPS/GNSS antenna. RTK base station supports full L1/L2/L5 bands.

What is an RTK base station?

An RTK base station is a fixed GNSS receiver placed on a known or unknown point. It used satellite signals to continuously calculate its position. Then it sends real-time correction data to a rover in the field. Thus, your rover can achieve maximum accuracy, up to centimeters. This practice replaces you being off by several metres using GPS alone.

How do I broadcast RTK corrections?

There are two main ways to broadcast RTK corrections: Once the base is active and corrections are broadcasting: Connect your rover to the base via radio or NTRIP. Confirm it receives a fixed RTK solution. Stake out or collect a few known test points. Check against local control to verify accuracy.

Should I set up my own RTK base station?

Setting up your own RTK base station may seem technical, but with the right tools and planning, it becomes a routine part of your GNSS workflow. Whether you use a local UHF radio or internet-based NTRIP caster, you'll gain full control and consistency in your field work.

Charging the RTK Base Station The RTK Surveyor has a built-in 1200mAh lithium polymer battery that will enable up to 5 hours of field use between charging. If more time is needed, a ...

There are two issues that are responsible for most problems with a base station: Shading and Multipathing. If a base station experiences one of these problems, it could be ...

Find a suitable location for the base station where it has a clear line of sight to the sky. Mount it on a stable and elevated platform to minimize obstructions. Attach the GNSS ...

This user manual will guide you through the steps of how to configure and install your RTK base station and send the correction data

Connect RTK UART to the GPS1 Port on the Flight Controller. If you are not using a flight controller (Ex, recording device), you connect this device to the USB port, and provide power ...

Whether you're working on construction, land surveying, or agriculture, this step-by-step guide will help you confidently set up a stable RTK base station using professional ...

Follow our detailed guide to correctly set up an RTK base station for accurate surveying. Simplify your workflow with expert tips and ...

Learn how to properly connect your ELT-RTK base with step-by-step instructions, tips on power supply, cables, and configuration for stable GNSS performance.

Charging the RTK Base Station The RTK Surveyor has a built-in 1200mAh lithium polymer battery that will enable up to 5 hours of field use ...

Follow our detailed guide to correctly set up an RTK base station for accurate surveying. Simplify your workflow with expert tips and best practices.

This topic introduces the concept of base station operation, provides information to help you identify good setup locations, describes best practices for setting up the equipment, and ...

Connect RTK UART to the GPS1 Port on the Flight Controller. If you are not using a flight controller (Ex, recording device), you connect this device to ...

Power On Base Station: Connect the power source and turn on the base station. Check indicator lights for status (e.g., power, satellite lock). Allow sufficient time for the base station to acquire ...
