What is a Bess & how will it impact Guyana?

The arrival of the BESS follows the earlier delivery of two gas turbines, each capable of generating 45 megawatts of electricity. Together, these components are expected to enhance the reliability of Guyana's national grid, reduce carbon emissions, and support the delivery of more affordable electricity.

What is the gas-to-energy project in Guyana?

Our operations in Guyana are helping to supply the world's energy needs by producing more than 600,000 barrels of oil a day. The Gas-to-Energy project is expected to greatly improve the quality of life for the people of Guyana.

How many barrels of oil are produced a day in Guyana?

More than 100 miles offshore Guyana, three of the world's largest, best-in-class floating production storage and offloading (FPSO) vessels - the Liza Unity, the Liza Destiny and Prosperity - are producing more than 600,000 barrelsof oil every day - up from 370,000 just one year ago.

As Guyana moves closer to commissioning the first phase of its landmark Gas-to-Energy project, momentum is already building for the project's expansion.

What is a Bess system?At the heart of WEG's BESS solution is an advanced energy control and management solution. This sophisticated system coordinates different operation modes, ...

The project is widely viewed as transformational for Guyana, which currently relies heavily on imported HFO to meet its electricity needs. The switch to domestically sourced ...

As a key component of Guyana's landmark GtE initiative, the BESS will enhance the project's efficiency and reliability; helping to stabilise the national grid, reduce carbon ...
