The Huawei LUNA2000 is a modular system and consists of one or more LUNA2000 battery modules. The system can be expanded at a later date by adding additional LUNA2000 modules or parallel LUNA2000 towers.

Huawei 5kWh battery module, expandable up to 15kWh and compatible with Huawei single-phase and three-phase inverters, with a 100% depth of discharge.

The Huawei LUNA2000-2.0MWH-2H1 is a turnkey, containerised energy storage system with 2,032 kWh (2.03 MWh) nominal capacity and a continuous rated power of 1,016 kW (1.016 MW) -- ...

The annual production and sales of new energy products include: 3GW solar modules, 800, 000 solar systems and 1.2GW solar power plant equipment. Customers are located in Europe, America, Asia, Africa and other regions.

Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a comprehensive energy storage system, releasing site potential.

Revolutionize your energy consumption with the Huawei Luna 2000 7kWh lithium battery. Thanks to its cutting-edge technology, this battery lets you store the excess energy produced by your solar panels for use when you need it most. Enjoy ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

system can be expanded at a later date by adding additional LUNA2000 modules or parallel ...

The new LUNA2000 battery from Huawei has 5kWh capacity modules. Up to 3 modules can be stacked to obtain a capacity of 15kWh although 2 towers can be connected in parallel to reach 30kWh.

With a 15-year warranty and scalable capacities from 7 to 21 kWh, it fulfils a wide range of energy storage requirements. The design enables fast charging and discharging, while integrated optimisers increase energy efficiency. Safety is ...
