---

Generally speaking, hydrogen hubs are emerging centers of activity involving hydrogen production, transport, delivery, and end use to provide modern energy services such ...

A first-of-its-kind, hydrogen-powered, 140-foot, 50-person marine research vessel will use liquid hydrogen to replace tens of ...

A first-of-its-kind, hydrogen-powered, 140-foot, 50-person marine research vessel will use liquid hydrogen to replace tens of thousands of gallons of diesel fuel a year.

What you need to know: With agreement signed and first round of funding secured, California is the first state to officially launch a Hydrogen Hub, an initiative to accelerate the ...

What you need to know: California is the first state to officially launch one of the country's seven hydrogen hubs - the next chapter of California's climate leadership and a key ...

The leaders of California's embryonic hydrogen hub announced Wednesday that they have signed a contract with the U.S. Department of Energy worth billions.

"Berkeley Lab welcomes the Department of Energy's plans to build and expand renewable, clean hydrogen projects in California that ...

On July 17, 2024, ARCHES and DOE jointly announced the signing of a \$12.6 billion agreement which made California the first awarded project location to formally launch its hub and begin ...

To reduce reliance on fossil fuels in industries where electricity is impractical, unreliable or too expensive,
