These inkstones have beautiful finish, finely ground and perfect for use with inksticks. They more economic than the collectors inkstones which use ...

Traditional Chinese ink is solidified into inksticks. Usually, some water is applied onto the inkstone (by means of a dropper to control the amount of water) before the bottom end of the inkstick is placed on the grinding surface and then gradually ground to produce the ink. More water is gradually added during the grinding process to increase the amount of ink produced, the excess flowing down into the reservoir of the inkstone where it will not evaporate ...

We offer famous Chinese ink stones, carved ink stones in wooden boxes. An inkstone is literally a stone mortar for the grinding and containment of ink. Traditional Chinese ink was usually ...
