Iran's Supreme Council for Economic Coordination (SCEC) has approved the allocation of \$1.5 billion for the installation of solar panels in response to the country's ongoing ...

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining 480 MW will be installed over the next 18 ...

Tarztalab said the projects are part of a larger government plan to build 3,000 MW of solar capacity through the development of ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, and the promising yet challenging road ahead.

This article analyzes the electricity situation in Iran and the application of solar energy systems in Iran. Use Xindun's popular solar energy system to solve Iran's electricity ...

This large-scale solar project is expected to significantly reduce greenhouse gas emissions and shrink Iran's carbon footprint. By shifting away from fossil fuel-heavy industries, ...

Iran has signed agreements with "multiple nations" to co-develop PV technologies, share equipment, and achieve a 12% solar share of total generation by 2026--up from 0.6% ...

The Iranian government is embarking on an ambitious initiative to transition all government buildings to off-grid solar energy ...

Tarztalab said the projects are part of a larger government plan to build 3,000 MW of solar capacity through

the development of modular 3-MW solar plants. Construction has ...

Major commercial projects now deploy clusters of 15+ systems creating storage networks with 80+MWh capacity at costs below \$270/kWh for large-scale industrial applications.

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining ...

This article analyzes the electricity situation in Iran and the application of solar energy systems in Iran. Use Xindun's popular solar ...

The Iranian government is embarking on an ambitious initiative to transition all government buildings to off-grid solar energy systems. This move aims to alleviate electricity ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, ...

The first phase of Iran's largest photovoltaic solar power plant, Aftab-e-Sharq, with a capacity of 20 megawatts, was successfully synchronized with the national grid on October ...
