---

When not used as a proper noun and written without capitalization, "solar system" may refer to either the Solar System itself or any system reminiscent of the Solar System.

Solar panels aren't very good at converting sunlight to electricity - most solar panels have at best a 20% efficiency rate (7) And their costs are high.

Our solar system includes the Sun, eight planets, five officially named dwarf planets, hundreds of moons, and thousands of asteroids and comets. Our solar system is ...

If you're considering going solar, it's helpful to know solar energy pros and cons first. This guide covers the advantages and disadvantages of solar energy.

How many planets are in the solar system? How did it form in the Milky Way galaxy? Learn facts about the solar system's genesis, plus its planets, moons, and asteroids.

OverviewGeneral characteristicsDefinitionFormation and evolutionSunInner Solar SystemOuter Solar SystemTrans-Neptunian regionAstronomers sometimes divide the Solar System structure into separate regions. The inner Solar System includes Mercury, Venus, Earth, Mars, and the bodies in the asteroid belt. The outer Solar System includes Jupiter, Saturn, Uranus, Neptune, and the bodies in the Kuiper belt. Since the discovery of the Kuiper belt, the outermost parts of the Solar System are considered a distinct region consisting of the objects beyond Neptune.

All this information is scrutinized in attempts to understand in detail the origin and evolution of the solar system--a goal toward which astronomers continue to make great strides.

Earth's is composed mainly of nitrogen and oxygen--key for sustaining life. The atmospheres on terrestrial

Venus and Mars are mostly carbon dioxide, while the thick atmospheres of Jupiter, ...

Purchasing a lower-quality solar panel may save money in the short run, but remember that solar panels are a long-term investment. The extra cost is often worth it.

For most homeowners, going solar delivers meaningful financial returns and environmental benefits. You'll slash your electric bills, reduce your carbon footprint, and often ...

The Solar System provides the only known example of a habitable planet, the only star we can observe close-up, and the only worlds we can visit with space probes. Solar System research ...
