-----

Lithium is one of the key components in electric vehicle (EV) batteries, but global supplies are under strain because of rising EV demand. The world could face lithium ...

Around 60% of identified lithium is found in Latin America, with Bolivia, Argentina and Chile making up the "lithium triangle". Demand for lithium is predicted to grow 40-fold in the ...

The main difference is the energy density. You can put more energy into a lithium-Ion battery than lead acid batteries, and they last much longer. That's why lithium-Ion batteries ...

Lithium is a lightweight metal used in the cathodes of lithium-ion batteries, which power electric vehicles. The need for lithium has increased significantly due to the growing ...

Explore our official blog for the latest news about , creator and artist profiles, culture and trends analyses, and behind-the-scenes insights.

As the demand for lithium soars in the race to net zero, it is becoming increasingly important to address and secure a sustainable lithium future.

Critical minerals like lithium, cobalt and rare earth elements are fundamental to technologies such as electric vehicles, wind turbines and solar panels, making them ...

Kids provides a more contained environment for kids to explore and makes it easier for parents and caregivers to guide their journey.

The shift to electric vehicles and renewable energy means the demand for lithium ion batteries and the metals they are made from is set to increase rapidly. But at what cost?

It's "s birthday week and we're celebrating by rewatching the videos that kickstarted careers, launched viral trends, and inspired iconic pop culture moments.

Learn more about help videos Browse our video library for helpful tips, feature overviews, and step-by-step tutorials. Known Issues Get information on reported ...

With the Music app, enjoy over 100 million songs at your fingertips, plus albums, playlists, remixes, music videos, live performances, covers, and hard-to-find music you can't ...

Too many lithium-ion batteries are not recycled, wasting valuable materials that could make electric vehicles more sustainable and affordable. There is strong potential for the ...

Chinese start-up recycles lithium from EV batteries Botree Recycling dismantles spent lithium-ion batteries and uses patented low-cost chemical processes to extract key minerals such as ...

The Top 10 Emerging Technologies of 2025 report highlights 10 innovations with the potential to reshape industries and societies.
