-----

Solar and wind energy are emerging as viable options to power refinery operations, reducing reliance on fossil fuels and cutting ...

Alnifro et al. (2017) describe the opportunity for solar PV, concentrating solar power, and wind energy to cost effectively support ...

In large crude oil refineries, keeping emission levels low and minimizing energy losses can primarily be controlled by performing thermo-economic and environmental ...

Alnifro et al. (2017) describe the opportunity for solar PV, concentrating solar power, and wind energy to cost effectively support refinery operations to reduce operational emissions.

In an unusual merger of renewable energy and fossil fuels, solar energy is being tapped to power an existing oil refinery. The Rodeo, California, facility operated by Phillips 66 ...

In an unusual merger of renewable energy and fossil fuels, solar energy is being tapped to power an existing oil refinery. The Rodeo, ...

Phillips 66, a global oil refiner, announced it has partnered with NextEra Energy to construct a solar facility to power its Rodeo, California refinery. The solar facility is designed to ...

PDF | On Apr 22, 2024, Yang Li and others published Thermodynamic and economic analysis of a novel solar heating crude oil system in oil refinery ...

This paper proposes a solar-assisted method for a petrochemical refinery, considering hydrogen production

deployed in Yanbu, Saudi Arabia, as a case study to ...

Solar and wind energy are emerging as viable options to power refinery operations, reducing reliance on fossil fuels and cutting operational costs.

The present study investigates the feasibility of solar hybrid system to generate steam in the oil refinery to maintain the temperature of heavy crude oil products before ...

A study by ENEA and the University of Palermo has shown that integrating concentrated solar heat into oil distillation processes could significantly reduce CO2 emissions ...

Phillips 66, a global oil refiner, announced it has partnered with NextEra Energy to construct a solar facility to power its Rodeo, ...

PDF | On Apr 22, 2024, Yang Li and others published Thermodynamic and economic analysis of a novel solar heating crude oil system in oil refinery | Find, read and cite all the research you...

A study by ENEA and the University of Palermo has shown that integrating concentrated solar heat into oil distillation processes could ...

The present study investigates the feasibility of solar hybrid system to generate steam in the oil refinery to maintain the temperature of heavy crude oil products before despatching from ...
