-----

With UN Secretary-General António Guterres urging governments to prioritise clean energy in 2025, Madagascar, under the leadership of President Andry Rajoelina, is ...

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar power in our field offices. This decision ensures reliable electricity, ...

The local company is a subsidiary of the German SUNfarming GmbH, a company that combines solar energy with regional food production. The financing of the project by atmosfair lowers the ...

The company Anka Madagascar was contracted for the construction and maintenance of the five systems installed so far. Many health centres are still waiting for electrification, which is why ...

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar power in our field offices. ...

Discover the key steps to adopting solar energy in Madagascar. With this article, learn how to take advantage of the benefits of this clean & sustainable energy.

This study demonstrates that solar air collectors can effectively meet heating needs in tropical climates like Madagascar. The experimental results confirm that the system provides sufficient ...

r collectors. In this work, we studied air solar collectors which is based on the circulation of heated air inside a serpentine for warming or cooling a house.

This paper investigates the performance of a solar air collector integrated into a hybrid heating and cooling system for buildings in tropical climates, specifically in Madagascar.

eco&#176; HVAC technologies for Madagascar deliver robust, high-efficiency cooling and ventilation, including: Air Handling & Package Units, Modular VRF Systems, A+++ Split Air Conditioners, ...

In this study, we will evaluate the performance of an electric vapor compression solar refrigeration system. in different cities of Madagascar using the most recent hourly climate data for each ...
