Manila Water activated the three solar power installations at the Cardona Treatment Plant, East La Mesa, and San Juan Compound. These systems can generate a ...

Manila Water activated the three solar power installations at the Cardona Treatment Plant, East La Mesa, and San Juan Compound. ...

NKS Solar One has submitted plans to build the country's first two big floating solar projects: a 162 MW floating array on Lake Caliraya ...

NKS Solar One has submitted plans to build the country's first two big floating solar projects: a 162 MW floating array on Lake Caliraya and an 88 MW project on Lake Lumot, both ...

The Philippines is sitting on a solar rooftop goldmine, with about 1,846 megawatts of capacity ready to power homes, businesses and industries, according to a think tank.

Manila Water, in partnership with MSpectrum, has completed the installation of 3.8 megawatts-peak (MWp) of solar capacity across ten of its facilities.

This solar-powered heart beats within our biodome, showcasing our dedication to energy efficiency and our commitment to reducing the reliance on conventional power sources.

Outdoor batteries bridge the gap between unstable grids and renewable potential. "A single 10kWh battery can power 3 Filipino households for 8 hours during outages - a lifeline in ...

A step towards sustainable energy took place today with the ceremonial switch-on of Manila Water's 2.5MWp
