---

At the base there are five potential lights. The first three are lit up, maybe green-ish color. I don't have any devices connected on my phone, no base no camera. Trying to ...

Try replicating the issue without the headset on and see if that basestation's LED stats lights change. You might not have the stations mounted securely enough and the ...

I've tried going into the Airport Admin Utility, but the base station doesn't show up in there either. The only way I can get it to work again is to either wait a couple hours and it will ...

If any of the base stations appear disabled in the SteamVR app, try the following to troubleshoot the problem: Turn the base station off and on again. Make sure that you've installed your base ...

My weather station can go offline for days and it comes right back online once network connection is reestablished. This is a problem with either the base station or the cloud ...

If the base stations have trouble wirelessly syncing with each other, there might be an obstruction in your play area. Check if using the sync cable would solve your issue.

Make sure that you've installed your base stations correctly. For details, see [Installing SteamVR Base Station 2.0](#). Restart the SteamVR app. If you still get an error, reboot your computer and ...

After it restarts, the base station light turns solid blue again, but the base station still does not appear in my Arlo account. The only solution is to completely reset it and reinstall ...

Here are some troubleshooting steps to try and fix base stations not being detected in SteamVR: 1. Check Power - Ensure base stations are powered on and status lights are green.

For users that are experiencing their base station no longer being visible within the Arlo mobile app or web client, you will need to re-onboard the base station by tapping "Add ..."

Last night, the cameras and base station disappeared from the app (iOS 17.0.3). Earlier in the evening, I notice that the HomeKit integration was gone, so I rebooted the base ...

Having issues with your Clover Station not starting or freezing? Try these 5 simple troubleshooting tips to get back on track fast. Read the full guide now.

Watching the SteamVR panel, I see that some seconds after the HMD turns grey, the icons for the base stations become greyed out, although they are still up and running ...

(9) If the robot fails to locate the base station for a long time, it is recommended to carry the robot to the front of the base station and click the HOME button, which is conducive ...
