Proof for the minimum number of comparisons required to get the maximum AND minimum element of an array. Ask Question Asked 5 years, 4 months ago Modified 3 years, 4 ...

I have been playing the app Euclidean, I have been doing quite well but this one has me stumped. &quot;Construct a triangle whose perimeter is the minimum possible whose ...

I'm searching for some symbol representing minimum that is commonly used in math equations.

In this case, it is easy to get \$ (0,0,0)\$. But, if the question is to find minimum of \$ (x^2+y^2+z^2)/xyz\$, then how we could solve this using a standard approach like we do in the ...

Hello,How can you use the previous question? can you post you full solution?Thank you

2 For an even number of data their median minimizes the sum of the absolute deviations. As in our case the median equals \$0\$, the minimum is \$6\$.

What is the difference between minimum and infimum? I have a great confusion about this.

In this way, you have to generate only a small fraction of all the codewords to find the minimum distance, and the idea can be generalized to any linear code. The first step then is to find a ...

You can't group the terms together and expect to have the same minimum, you are minimizing two different functions. If you're familiar with calculus you could consider looking at ...
