Mongolia aims for 30% renewable energy by 2030, a major shift from its 90% coal reliance. Discover the challenges, investments, and solar successes driving this transition.

Ulaanbaatar, 3 February 2025 - The Chingeltei District of Ulaanbaatar and the United Nations Development Programme (UNDP) in Mongolia have launched the Solar Facility Project, a new ...

Solar air conditioning, or "solar-powered air conditioning", refers to any air conditioning (cooling) system that uses solar power. This can be done through passive solar design, solar thermal ...

In 2024, the pilot project introduced clean energy heating systems for 69 households in Ulaanbaatar and Erdenet ger areas, cutting ...

The second heating system in Kindergarten B uses the electricity from a 20 kWp photovoltaic system to directly and efficiently heat the individual rooms with 19 air-conditioning units, i.e. air ...

Solar-powered air conditioners just make sense. After all, you're most likely to use your AC when the sun is beating down on your ...

In individual houses and the Ger areas, the supply of heat is changed from coal-based stoves and HOBs to a mix of direct electric heating, air-water heat pumps and ground-source heat ...

Ulaanbaatar, 3 February 2025 - The Chingeltei District of Ulaanbaatar and the United Nations Development Programme (UNDP) in Mongolia have ...

Inner Mongolia Energy Group's new solar farm in Baotou is a significant development in Mongolia's renewable energy landscape, ...

In 2024, the pilot project introduced clean energy heating systems for 69 households in Ulaanbaatar and Erdenet ger areas, cutting coal dependency and improving air ...

Mr. Sambuu initially turned down the opportunity to install solar panels, expressing skepticism that the system would work in the bitter ...

Mongolia aims for 30% renewable energy by 2030, a major shift from its 90% coal reliance. Discover the challenges, investments, ...

Mr. Sambuu initially turned down the opportunity to install solar panels, expressing skepticism that the system would work in the bitter Mongolian winters. But after witnessing the ...

Solar-powered air conditioners just make sense. After all, you're most likely to use your AC when the sun is beating down on your home. This piece will review the need for solar ...

This microstudy underscores a critical finding that a coal-to-solar energy transition can substantially reduce household air pollution, and immediate efforts are necessary to study its ...

Inner Mongolia Energy Group's new solar farm in Baotou is a significant development in Mongolia's renewable energy landscape, underscoring the nation's ...
