What is the NZ battery project?

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island. Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

What is a New Zealand battery?

Energy type: Battery storing electricity generated by New Zealand's hydro, geothermal and wind power stations when there is low demand. Construction: Begun July 2024 with the battery expected to be operational by March 2026.

How does a lithium ion battery work in New Zealand?

How it works The lithium-ion batteries (similar technology to those used in EVs and laptops) will store electricity generated by New Zealand's hydro, geothermal and wind power stations when there is low demand. Without this storage this electricity would otherwise go to waste.

BESSNZ is a new company focused on Commercial & Industrial (C& I) and large Residential battery energy storage solutions that will lower your ...

Construction and commissioning of the Ruakaka battery energy storage system (BESS) on New Zealand's North Island is complete, with the site expected to reach full ...

This article explains the importance of grid-scale batteries as New Zealand shifts towards a highly renewable electricity system. What is grid battery storage and why is it ...

Energy type: Battery storing electricity generated by New Zealand's hydro, geothermal and wind power stations when there is low demand. Construction: Begun July 2024 with the battery ...

This article comments on some of the highlights and where we see clear signals that New Zealand is "open for business" for further BESS development at scale. If you would ...

Genesis Energy, a prominent energy generation, wholesale, and retail company in New Zealand, has commenced the construction of a 100MW/200MWh battery energy storage ...

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme ...

While hydro still rules, New Zealand is starting to take battery storage seriously, especially on the North Island.

The Saft battery division of French energy and petroleum multinational TotalEnergies will supply 70 of its containerized Intensium Shift+ battery energy storage ...

HITEK ENERGY recently hosted a delegation of energy experts from New Zealand for an exclusive factory tour, showcasing our advanced LFP battery production line and ...

Contact is developing a 100-megawatt battery at New Zealand Steel's Glenbrook site, in south Auckland, on industrially zoned farmland near the corner of Brookside Road and Glenbrook ...

WEL Networks and Infratec are proud to announce the launch of New Zealand's largest Battery Energy Storage System (BESS) with commissioning underway.

Electrotest provides tailored Battery Energy Storage System (BESS) solutions in New Zealand. From design and integration to testing and commissioning, our experts deliver reliable, cost ...

This article explains the importance of grid-scale batteries as New Zealand shifts towards a highly renewable electricity system. What is ...

Battery Town Marine (BTM) specializes in marine battery sales and services, offering comprehensive solutions including battery testing and electrical wiring. With a network of ...
