We develop, construct, and operate utility-scale solar parks across Europe on our mission to make everyone benefit from solar energy. As we pursue this mission, our vision is to emerge ...

Utility-scale solar projects in Sweden, Finland, and Denmark are flourishing, while battery storage and AI are reshaping what's possible for grid stability and long-term power ...

The Nordic region is experiencing a surge in fossil free electricity demand, with Sweden and Finland leading the way in solar power expansion. While the Nordics are known for their strong ...

This study analyses how the rapid growth of utility-scale solar PV in the Nordic region will impact its economic viability by 2030, using Finland as a case study. The analysis is based on ...

We develop, construct, and operate utility-scale solar parks across Europe on our mission to make everyone benefit from solar energy. As we pursue ...

Discover the Nordic grid system's intricacies and seize solar prospects across Norway, Sweden, Denmark, and Finland in this comprehensive guide.

This executive summary provides an overview of the analysis conducted on the transformation of the Nordic electricity system until 2050, focusing on the Finnish-Swedish power system.

During the recent surge in solar PV installations, the Nordic countries - Sweden, Norway, Finland, and Denmark - have increasingly embraced solar PV technology, defying their northern ...

The Nordics are increasingly adding solar to their renewable mix. We explore their solar energy strategy and share the figures that prove their success.

The power generated from solar has already surpassed the CNS 2030 target of 1 TWh. Electricity generation from geothermal energy has stabilised at just above 6 TWh, topping the CNS ...

During the recent surge in solar PV installations, the Nordic countries - Sweden, Norway, Finland, and Denmark - have increasingly embraced ...

The power generated from solar has already surpassed the CNS 2030 target of 1 TWh. Electricity generation from geothermal energy has stabilised at ...

The report communicates our shared perspective on key development trends in the power system and strategies to address emerging challenges. It also provides a status update on ongoing ...
