U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries and solar power inverters that bypass ...

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the world's electricity. "It effectively means there is a built-in way to...

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on ...
