How do agencies counteract infrastructure obstructions to radio propagation?

Agencies across the United States have used system planning, implementation techniques, administrative policy, and state, city, or municipal code to counteract the impacts of infrastructure obstructions to radio propagation.

Are there undocumented cellular radios in foreign-manufactured inverters & battery management systems?

The U.S. Federal Highway Administration circulated the advisory on August 20, cautioning that it discovered undocumented cellular radios in some foreign-manufactured inverters and battery management systems.

What are structural and human-made obstructions?

Structural and human-made obstructions. This includes any structure that might weaken or interfere with radio signals. These structures may be fixed (e.g., bridges) or non-fixed (e.g., cranes), or may have moving or alternating components (e.g., wind turbines).

U.S. officials warn rogue radios may be hidden in solar-powered highway infrastructure, including chargers and traffic cameras.
