Does Paris have a greening programme?

Yes, the Paris greening programme has been one of the emphases of the adaptation strategy of the Paris Climate Plan which aims to prepare the city for climate changes. One of the objectives is to reduce urban heat island effects within Paris and its inner suburbs.

Does the Greening Program of Paris Boost access to green spaces?

Yes, the project boosts access to and use of green spaces (IUCN, 2019). Starting in 2007, the Greening Program of Paris is one of the elements in the strategic adaptation of the Climate and Energy action plans for Paris, getting the city ready to deal with climate change and resource depletion.

Is Paris' new urban plan bioclimatic?

The French capital's new urban plan is bioclimatic. It represents a difficult gamble: to increase green areas and social housing at the same time. Is it possible to reconcile new construction and more green space within the completed perimeter of Europe's densest and most built-up capital? The City of Paris believes it can.

What is green in Paris?

It encompasses all areas of vegetation in the city, making up nearly one fourth of the Paris area, through repeated and interconnected green touches, in order to raise the quality of life and increase the attractiveness of Paris. (IUCN, 2019).
