Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

Nearly-zero energy buildings, is a requirement introduced by the Energy Performance of Buildings Directive EU/31/2010 (revised in 2018). It means that all new buildings - as of 2020 - must ...

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and ...

In its latest report Summer Outlook 2025, published today, the European Network for Transmission System Operators for Electricity (ENTSO-E) confirms that there are no ...

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is ...

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

EU countries can work together to achieve their clean energy targets through the renewable energy financing mechanism.
