Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Vasco da Gama CoLAB is a Portuguese collaborative laboratory for the research and development of energy storage solutions. VG CoLAB develops innovative energy storage ...

Spain and Portugal's unique geographic endowments--including ample opportunities for cost-effective renewable energy production and significant raw materials--as well as their mature ...

Veolia has secured a 270MEUR contract to manage the Waste-to-Energy Plant in Porto, Portugal, for an additional 15 years. This facility, operated by Veolia for 25 years, will ...

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to ...

Polish renewables company R.Power is looking to develop 680 MW of standalone battery energy storage system (BESS) projects in Portugal in support of the government's ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape ...

The future of Portugal's power grid lies not only in generating more clean energy but in managing it intelligently. Storage is both the brain and the muscle of this new grid.

By 2030, Portugal's electrical grid will require storage support to address the peak seasonality of demand patterns and rebalance in the network due the new high-consumption sources

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors ...
