On 17 December in Lisbon, Hyperion Renewables announced the launch of battery storage projects in Estremoz and Vora, developed in partnership with Omexom Portugal and Saft, a ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

Welcome to Portugal, where energy storage isn't just tech jargon - it's becoming as common as pasta in Lisbon cafés. With solar farms sprawling across Alentejo and ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy ...

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and ...

With a combined injection capacity of 16 MW and a total storage capacity of 64 MWh, these systems store electricity produced during periods of high solar generation and ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Summary: Portugal is emerging as a leader in electromagnetic energy storage innovation, blending
