The Portugal Power Market is expected to reach 27.04 gigawatt in 2025 and grow at a CAGR of 8.81% to reach 41.24 gigawatt by 2030. Acciona SA, Finerge SA, Iberdrola SA, ...

Sines power plant (hard coal) started operation in 1985-1989 in Portugal. According to WWF its CO2 emissions were among the top dirty ones in Portugal in 2007. That coal power plant went offline in January 2021, with the one remaining coal power plant in the country, closing at 7h15 on the 19th of November 2021.

Portugal has also been using water power to generate power for the country. In the 2010s, a local company, Wave Roller installed many devices along the coast to make use of the water power.
