-----  
Are off-grid solar systems expensive?

Off-grid solar systems are typically costly to install and can be significantly more expensive than on-grid systems. Additionally, off-grid solar systems are unable to connect to the grid. This means if there are any battery charge issues, the grid will be inaccessible and you may be without power.

What is a 40' shipping container home with solar panels?

If you're dreaming of a sustainable lifestyle, our 40' Shipping Container Home with Solar Panels is perfect for you. Built from recycled steel, this home is both durable and eco-friendly. With its own solar panels, you can live completely off the grid and reduce your carbon footprint.

What is an off grid container home?

With our 40' Off Grid Container Home, you can live anywhere without the need for electricity from the grid. Our solar panels provide all the power you need to live a comfortable life. You'll enjoy the freedom of going off the grid and reducing your reliance on fossil fuels.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Read on to learn about a few of the best companies in the U.S. that can help you design and install your very own off-grid solar system.

We will provide you with a shipping estimate when finalizing your purchase contract. Please see our website shipping page for more information ...
