How much do solar panels cost in California?

In this article, we'll explore the cost of solar panels in California, the factors that influence these costs, and how homeowners can make the most out of their investment. The average cost of installing solar panels in California ranges from \$2.50 to \$3.45 per watt.

How much do solar panels cost?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer.

How much does a solar system cost per watt?

Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. $\text{Net cost of the system} / \text{lifetime output} = \text{cost per kilowatt hour}$

As of 2025, the average cost to install solar panels in California is around \$2.40 to \$3.25 per watt. For a typical 5kW system, this equates to \$12,500 to \$17,300 before federal ...
