Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

Why did EPA develop a solar RFP document checklist?

EPA developed a solar RFP document checklist to keep track of key components, such as scope and deliverables, specific requirements, and RFP submission process and key dates.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a solar PPA?

A solar PPA is a financial contract in which a third-party developer owns, operates, and maintains the PV system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

The purpose of this RFP template is to provide guidance for the procurement of solar PV. This template contains information on project background, scope of work, proposal ...

If you're an EPC contractor, project developer, or a caffeine-dependent engineer scrolling through yet another article on energy storage photovoltaic bidding documents, welcome!

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

Let FEMP's steps to evaluating electricity procurement guide the way. Find utility programs that meet statutory requirements or offer financial incentives. FEMP's six-phase process for ...

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

Solar-Plus for Electric Co-ops (SPECs) was launched to help optimize the planning, procurement, and operations of battery storage and solar-plus-storage for electric cooperatives.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Streamlined solar and energy storage buying process through the use of a proven cooperative procurement program. Free project feasibility study and savings analysis for any public agency ...

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be directed towards tools, resources, and ...
