Repair Service: Replacing the LR arm axis was honestly a relatively easy repair. After replacing the arm, and powering up the gimbal does its vertical and horizontal tests, but ...

I have put back together the entire gimbal already, and I would much rather superglue a plastic piece to the motor than fully disassembling the gimbal again and replacing ...

The original part is an isolated, switched-mode converter; high efficiency. The LM317 is a non-isolated, linear regulator, and not suitable for 48V input. (A linear regulator ...

Replacing a part on MOST DJI Drones does indeed require that the part be serialized. its not a big secret and I am sure the OP is aware of that. Replacing the sensor will ...

But a brief search on the net did not come up with any difinitive info on replacing batteries or on what type of batteries they are. My own thought, and as much as I like the ...

You can try replacing it. I'd use a 2A standard diode. The leads and body look too fat for a simple 1N4001 to 1N4007 range. Also, are you sure it's the problem? Is this the switch ...

I'm replacing the left front leg. I can't get the spring loading to work. Leg just flops around. Any help?

Hi everyone, My DJI RC with the integrated screen, bought with my Mini Pro 3 two years ago, is now showing its age. Even when charged to 100%, it drops to 80% after a few ...
