**What to do if a circuit breaker trips?**

Turn off and unplug everything on the circuit, then reset the breaker. If it trips, turn off the breaker and call an electrician. Power off all electrical devices connected to the circuit breaker. Any device can create a demand on a single circuit and overload it, tripping the breaker off.

**How do I Reset my circuit breaker?**

To reset the main breaker: Turn off all circuit breakers. Flip the main breaker's lever to the ON position. Turn the circuit breakers on again, but individually and not simultaneously. Before you get started on resetting your circuit breaker, check out these tips to ensure you are being smart and safe.

**How do I fix a tripped breaker?**

Prepare to Reset the Breaker: Ensure all connected appliances are turned off before resetting the tripped circuit. Reset the Breaker: Firmly push the tripped breaker to the "off" position and flip it back to "on." Professional assistance may be necessary if it won't stay ON or immediately trips again (or if it's stuck in the middle).

**What is a tripped breaker?**

The terms "tripped breaker" or "tripped circuit" denote situations where the circuit breaker has automatically switched off due to an overload or short circuit, effectively cutting off the power supply to that specific area.
