By combining cutting-edge technology and unique expertise, Reykjavík Geothermal's dual focus ensures our projects not only meet ...

Reykjavik Energy supplied the initial funding for Carbfix. Further funding has been supplied by The European Commission and the Department of Energy of the United States.

In this paper we will present the goals of Reykjavik Energy in our deep utilization journey, identify knowledge gaps and go through the key parts of our plans to go deeper and ...

The company Carbfix, since 2019 established as a subsidiary of Reykjavik Energy, was initiated as a project in 2006 and formalised in 2007 by four founding partners: Reykjavík Energy, the ...

The enhanced geothermal system with integrated cogeneration and energy storage is combined with green power heating technology to store renewable energy in the form of thermal energy.

Nestled in the world's northernmost capital, the Reykjavik Energy Storage Project is rewriting the rules of sustainable energy. With Iceland already sourcing 85% of its energy from renewables ...

There is potential for relocating the pilot plant to various sites for future Carbfix pilot projects. The pilot plant captures all H₂S that flows through it and up to 98% of CO₂.

By combining cutting-edge technology and unique expertise, Reykjavík Geothermal's dual focus ensures our projects not only meet today's energy demands but also ...

The NDRC said new energy storage that uses electrochemical means is expected to see further technological advances, with its system cost to be further lowered by more than 30 percent in ...

This facility near Reykjavik scrubs CO₂ from geothermal steam leaving Iceland's Hellisheiði power plant and begins the process of securing it underground, where it ...

Reykjavik Energy's (Orkuveitan) financial forecast for the years 2025 to 2029, which was approved by the board on October 28th, includes the company's ambition to be an ...
