Address (Main Headquarters): D. I. Mendeleev 21-25, district 1, Bucharest, 010362, Romania  
Contact via email  
Minister's Office Phone: +40 21 319 23 26  
Website The reference framework in the field of broadband network development in Romania supports the Gigabit Society 2025 as well as Digital Decade 2030 targets.

Does Romania use Chinese technology in 5G networks?

In September 2019, the former US Ambassador to the European Union praised Romania for not using Chinese technology in its 5G networks. In January 2020, the US Embassy in Romania issued a statement emphasising that companies connected to an authoritarian government like China could not be trusted.

What is the role of the authority for the digitization of Romania?

The role of the Authority for the Digitisation of Romania (Autoritatea pentru Digitalizarea României) is to achieve and coordinate the implementation of public strategies and policies in the field of digital transformation.

Do mobile phones need a base station?

Mobile phones and other mobile devices require a network of base stations in order to function. The base station antennas transmit and receive RF (radio frequency) signals, or radio waves, to and from mobile phones near the base station. Without these radio waves, mobile communications would not be possible.

The provision of electronic communication services and networks in Romania is primarily regulated by Government Emergency ...

Without these radio waves, mobile communications would not be possible. Radio waves have been used for communication for more than 100 years. Radio and television broadcasting are ...
