Automated Glass Load Station An automated robot picks up PV module glass from a horizontal or vertical type load port located on a pallet or rack. As the robot is unloading one rack of glass, another ...

Function Introduction The suction cup is used to absorb the second-floor glass of the double wave component after the sheet to repair

We can customize the special equipment and provide customers with one-stop solutions of glass processing. Our company provides good service for customers, meanwhile, our sales team also actively develop foreign markets.

Featuring a robust vacuum system, this device simplifies the loading of glass onto conveyor belts and the unloading of finished solar panels into pallets.

Our flat glass gantry loaders are suitable for furniture glass, household appliance glass, bathroom glass, architectural glass and solar glass. Technical specification of Flat Glass Gantry Loaders & Unloaders

This manual provides comprehensive guidelines for the safe and efficient Unloading and storage of solar photovoltaic (PV) modules manufactured and supplied by JAKSON Engineers Limited.

Continuous production is ensured by automated loading and unloading. The optimised suction and placement process ensures consistent product quality. This prevents the suction cups from unnecessarily slipping off when the sheets are ...

The loading and unloading of the glass takes place thanks to a conveyor equipped with forks which, starting from a vertical position, are lowered until the glass is deposited on the transport rollers.

Continuous production is ensured by automated loading and unloading. The optimised suction and placement process ensures consistent product quality. This prevents the suction cups from ...

One is with a rotary table, the other is a robot with rotating function. The robots can be used for loading and unloading purposes.more

We can customize the special equipment and provide customers with one-stop solutions of glass processing. Our company provides good service for customers, meanwhile, our sales team also ...

Precision Handling: Glass loading robots are equipped with advanced gripping mechanisms that can handle glass sheets with high precision, ensuring accurate placement without causing damage.
