Are solar and storage a necessity in Puerto Rico?

Rúa-Jovet said blackouts have become so routine that solar and storage are now a necessity in Puerto Rico and demand is unlikely to be slowed by changes in federal policy -- some of which were enacted through the tax code, which has limited impact on the territory.

Does Puerto Rico have a resilient energy system?

"That kind of shifted, in people's minds, the thinking on energy and the value of resiliency, and the importance of just basic energy," Rúa-Jovet said. The Puerto Rico Energy Public Policy Act of 2019 codified the role of solar and storage in the island's energy system and set a 100% renewable energy target by 2050, with interim targets on the way.

What happens during a power outage in Puerto Rico?

People in the line wait food on a dark street during a major power outage on December 31, 2024 in San Juan, Puerto Rico. Blackouts have become so routine that many households are investing in solar and storage, which can then be deployed to the grid. Miguel J. Rodriguez Carrillo via Getty Images

What is the first virtual power plant in Puerto Rico?

What started as a modest pilot program is now the first virtual power plant of its kind in the region, advocates say. People in the line wait food on a dark street during a major power outage on December 31, 2024 in San Juan, Puerto Rico.

China holds a leading position in solar and energy storage technologies, and relevant enterprises can explore project tenders and partnership opportunities in the Puerto ...

The Interstate Renewable Energy Council (IREC) announced that Planta Solar has been selected to install and maintain new Energy ...

Convergent Energy and Power has closed a \$584.5 million loan facility to build solar and battery storage projects in Puerto Rico.

The U.S. Department of Energy (DOE) will provide over US\$500 million in loans to build and operate utility-scale solar and storage systems in Puerto Rico, enhancing the ...

Puerto Rico's fragile grid has been given a boost, with the US Department of Energy (DOE) offering more than half a billion dollars via the Loan Programs Office (LPO), under ...

This project aims to enhance energy independence, reduce electricity costs, and promote a cleaner and greener future for the residents of Puerto Rico. It is a significant step ...

Puerto Rico's fragile grid has been given a boost, with the US Department of Energy (DOE) offering more than half a billion dollars via ...

On January 17, 2025, LPO announced two conditional commitments and one loan closing to power producers in Puerto Rico comprising over \$1.2 billion in total.

According to the LPO, widescale solar and battery storage deployment has been proven to benefit communities across the island by increasing grid reliability and resilience to ...

Nearly every night for the past two weeks, Puerto Rico's grid operator has called on tens of thousands of batteries scattered across the island to overcome energy shortfalls and ...

This project aims to enhance energy independence, reduce electricity costs, and promote a cleaner and greener future for the ...

The U.S. Department of Energy (DOE) will provide over US\$500 million in loans to build and operate utility-scale solar and ...

According to the LPO, widescale solar and battery storage deployment has been proven to benefit communities across the island by ...

The Interstate Renewable Energy Council (IREC) announced that Planta Solar has been selected to install and maintain new Energy Resilience Hubs that incorporate solar ...

The analyst attributed Puerto Rico's residential solar and storage growth largely to high electricity prices due to imported fossil fuels, third-party ownership financing, and "one-to ...
